

*Unlocking the power of partnership.*

ECI Group has a long history of providing highly specialized and quality Professional Engineering Services to our clients. We recognized the need to provide more to our clients by supplying experienced, technical staffing in their facilities and in 1985, the Professional Technical Services (PTS) Division was created. The flexibility of providing highly qualified professional staffers, on a contract basis, has proven to be a great source of support to our clients.

### Our Promise

- PTS will provide technical staff that will accept long or short-term assignments. Utilizing the specialized training, skills, education and practical knowledge of our staff allows you to meet your manpower demands-when you need them.
- PTS will provide employees at competitive rates. Our reputation, coupled with networking and national/international advertising, affords us access to the most qualified individuals, at competitive rates.
- PTS will always be responsive to your needs. The combination of our automated matching system and large resource pool enables us to meet critical staffing requirements quickly.

***We are committed to the success of your business.***

*We promote a professional atmosphere where our employees can conduct work of the highest caliber for our clients.  
Our skilled professionals are ready to work in all areas of your facility.*

Unlike other companies, PTS is a division of an engineering company, so we know firsthand the skillset that is needed to fill technical positions in your facility. Our PTS staffers have been an extension of the ECI Group for over 35 years. Let us help you fill technical positions in your facility.
