Material Movement Coordinator PITTSBURGH, PA

Prepared By: *ECIG*

This position profile has been compiled by ECIG to identify and hire for the specified role. The following is provided for your personal information and should be kept confidential.

Material Movement Coordinator [2256]

Our client is a global group of energy and petrochemical companies with about 84,000 employees across more than 70 countries. They aim to meet the world’s growing need for more and cleaner energy solutions in ways that are economically, environmentally, and socially responsible. Our client has identified an immediate need for a **Material Movement Coordinator [MMC]** at their polymer production facility in the greater Pittsburgh, PA area. The MMC maintains the aggregated schedule of GoM material movement from all assets and functions. This contract position has an anticipated duration of 6-12 months.

COMPANY INFORMATION:

Our client has recently constructed petrochemical complex in Western Pennsylvania. The overall site measures approximately 800 acres - with a core manufacturing and logistics area of approximately 386 acres. The site is located along the Ohio River in Potter Township, Beaver County - approximately 30 miles northwest of Pittsburgh. This production facility will produce Linear low-density polyethylene (LLDPE) which is the primary raw material for items like flexible food packaging and pouches, collation shrink wrap, stretch film, protective packaging, flexible tubing, sports equipment (canoes), industrial equipment (tornado shelters), wire and cable insulation, agricultural films; and High-density polyethylene (HDPE) that is used to create “stiffer” products such as toys, crates, drums, shampoo bottles, milk jugs, detergent/bleach bottles, pails (buckets), environmental liners, paint containers, garden furniture and other types of housewares. The Beaver petrochemical complex includes:

- Ethylene Cracker Unit,
- Three Polyethylene units with a combined production capacity of 3.5 billion pounds,
- 250 Megawatt Cogen Plant to power the site

YOUR ROLE WITH THE COMPANY:

The Material Movement Coordinator maintains the aggregated schedule of GoM material movement from all assets and functions. They ensure optimization of logistics resources that will deliver materials in a safer and reliable manner through effective planning that aligns with the ambition of our stakeholders. They will be the functional and process expertise that will adopt and implement best practices.

- Accountable for safe and reliable movement of materials for the GoM
- Maintain, develop and ensure processes involved in the movement of materials
- Provide aggregated schedules for materials movement in IS and ST windows
- Actively participate in contract management teams associated with material movement
- Delivery supply chain commitments approved through relevant SLA’s and KPI’s
- Ensure resources required for materials movement are available through demand and capacity planning
- Ensure improvement opportunities and learnings are captured
- Active team member in ICS (Incident Command Systems) and HIC (Hurricane Incident Command)
- Resolution of inefficiencies and cost performance and agree on improvement plans with key interfaces
- Interfacing with AMS integrated processes to identify process changes and protocol
- Contract Holder for tactical contracts related to materials movement
- Interface with IAP and ALC’s to understand readiness of current and planned activities
- Safe and effective delivery of materials
- Cost performance associated with material movement
- Effective schedule: optimized and utilized effectively
- Continuous improvement of supply chain delivery
- Identify and deconflict marine bottlenecks in ST window
- Seek to understand barriers to success and be a key contributor in identifying opportunities to improve.
- Will be an integral member of category contract management teams and will act as the Contract Holder (CH)
